

# Solving the Food Insecurity on College Campuses

Project Title	Solving the Food Insecurity on College Campuses
Project Summary	Last year, in the US an average of 36 percent of students on U.S. college campuses were considered “food insecure”. That’s why the Puerto Rico Foodbank, a non-profit that collects and distributes food to hunger-relief charities, are partnering with universities to find solutions to this problem.
Country	United States

## Project Description

Problem: The food insecurity in College Campuses

Goals: To create a model that will help minimize the problem

Project Activities:

- Communication between the University and Foodbank
- Compile students and program data (absenteeism, completion and GPA)
- Use data for infographics
- Create and send surveys

## Required Skills or Interests

### Skill(s)

Data analysis

Data visualization

Design thinking

Infographic design

Research

Storytelling/blogging/vlogging

Survey / polling design

Writing
